

XM satellite radio is a paid subscription service that I pay by the month so I can listen to programming that I enjoy & find to be useful to me. AS a professional driver I find Instant Traffic & Weather reports extremely Useful necessary tool in my work. I feel that House Resolution #4026 to be an intrusion into need to know important information about the areas that I travel in & thru. Please do not change or interfere with the way XM Satellite Radio is allowed to operate. Thank you very much.
